Samsung sdr-b3300n admin password

I have recently acquired a SDR-B3300n Samsung DVR,it works great for recording but one of the main reasons for the purchase was being able to view from the internet and have it email me upon motion detection.. I can not get it to connect to Samsung's DNS service, so can get none of the above working.The 2 things I can put it down to:Firmware update - can not find one for the life of me now as Samsung only supports the latest modelsSamsung has change their DNS website so the old 'ipolis' address that is uneditable on my DVR is no good.The old DNS address was: www.samsungipolis.com/DVRNAME is now: www.ddns.hanwha-security.com/DVRNAMEThe main body of the address is greyed out and unedditable on my DVR so that leaves me wanting to perform a firmware update.. but I cannot find a single one for my model anywhere.This is leaving me ridiculously frustrated..If anyone has any kind of help/input, I would be ridiculously thankful! :) Close. com/Product/Detail/90/Samsung-SDS-P5102-16-Channel-DVR-Security-SystemAmazon. With just the cameras showing, press the following in quick succession using the remote: Freeze; Alarm; Freeze; Alarm; Freeze; Menu; Enter. The answer is to hit Freeze, Alarm, Freeze Alarm, Freeze, Return as fast as you can and then hit ok when it says return to factory settings.
